

# *Kids Closet*

## **BEFORE**

This closet was part of a remodeled space, so we got to plan every inch of what they would need for three growing girls. Each girl has their own section of closet, with the oldest maximizing the corner at the end.

We used Flor tile in three different colors, then coordinated hangers for each of the girls to match the Flor tiles. Storage was the most important part of this install. The oldest, who has the least amount of clothes, get the smallest space. Her dresser is in the bedroom space around the corner.
